

Sensational Kid! Program

SK! is a fun-filled occupational & music therapy based sensory program for children who are experiencing challenges within their environment.

Program Goals:

To **Identify** and **implement success oriented** strategies for regulating sensory based needs, which allow children to reach their full learning potential.

To **increase and strengthen gross motor** skills needed for strength, coordination and balance.

To **sustain self-regulation** for increased attention, listening, concentration and cooperation skills.

To **increase and strengthen fine motor** skills needed for eating, dressing and handwriting.

Candidates may:

- Have sensory based challenges: fidget on/off seat, crave movement, body tension, seek negative or positive reinforcement.
- Include children with other learning challenges such as dyslexia or grapho-motor issues.
- Have a short attention span, weak listening skills ,difficulty concentrating, disruptive ,talkative or ADHD.
- Have delayed language development/articulation/self-expression, or have an auditory processing disorder.
- Have been diagnosed or show signs of having anxiety.

Program Schedule: 1 hr weekly for 10 weeks.
