

Writing Sensation!

- For children struggling with handwriting issues or now getting ready for the challenge of school, our program is designed to assess and improve a child's handwriting abilities for increased efficiency, improved legibility and decreased frustration at home and school.
- This program runs 1 weekly for 12 weeks and includes a Handwriting Without Tears activity book and pencil.

Is a highly effective program designed by our trained occupational therapists, to teach children how to write letters accurately and fluently. Through multisensory activities that incorporate gross and fine motor skill development, we directly address handwriting instruction as well as target the underlying issues that contribute to poor handwriting.
